ARE WE TRAPPED IN NATURE?

(A combined Exploration for the Truth)

NATURE DYNAMICS OF LIFE

- 1)-<u>Theories</u>, <u>Philosophies</u> and <u>Beliefs</u> are all fabricated by Man, in the effort to describe the <u>Nature</u> and if faulty, they could be improved, changed or replaced from time to time.
- 2)- Fundamental <u>Realities of Nature</u> remain <u>Unchanged</u> everywhere in the Universe, just as the astronomical proof, the composition of <u>Water</u> remains unchanged in <u>Galaxies</u>.

- 3)-Nothing happens <u>By Chance</u> in <u>Nature</u> and though complicated to understand, a reasonable <u>Causation</u> is there behind everything.
- 4)-<u>Origin</u> and <u>End</u> are the essential destinations for <u>Linear</u> Thinking and what is the significance of 'Origin of the World' whence Astronomers find adequate proofs of new worlds, being emerged in the space even at this very moment of <u>Time</u>?
- 5)-<u>Time</u> is immaterial and it cannot be recognized at all unless things <u>Change</u>. Hence, '<u>Change of</u> <u>Matter</u>'(*Dynamics*) is dominant in Universe and 'Time' is just to represent the <u>Relative Existence</u> between Changes

<u>Changes</u>.

- Supported by: The concepts of '<u>Dynamic Package of World</u>' and '<u>Relativity</u>' -(Albert Einstein'/20th century)
- 2. Supported by: '<u>Anithya</u>- World at continuous Change' the 1st Reality and 'Anathma- World sensed as Permanent, but a mistake Relative to the Observer-the 3rd Reality-(Buddha/6thcentury BC)
- 6)-<u>Matter</u> is recognized in Existence, in the Three Fundamental States of <u>Energy</u> which are;

- Solid Matter (Atomic matter including solids, liquids & gasses):-energy in atomic rotary motion
 Supported by: atomic energy E=mc² where 'c'-velocity of light and 'm'-mass. -(Albert Einstein'/20th century)
- 2. <u>Energy Matter</u> (rays such as; light, heat, laser, α , β , γ ...):energy in linear projection:

Supported by: "Rays are of continuous linear projection of energy particles" and 'Kinetic Energy of moving matter $=^{1}/_{2} \text{ mv}^{2}$ where v is the velocity'-*Sir. Isaac Newton/1642-1727*)

 Medium Matter:-Energy at stillness-(Matter requires Energy to possess a Volume in a Pressure Medium)- (Volumetric Energy =Pressure x Volume).

1. Supported by the old concept of the 'Etheric Medium' that exists in the free space.

2. Supported by (Akasha Dhathu)-one of the five Fundamental Matters of Nature -(Buddha/6th century BC)

7)- Everything in Nature including <u>Life</u>, must be made up of aforesaid three Fundamental Matter.

Only the <u>Physical Body</u> of Life which is made up of <u>Atomic Matter</u> is recognized but the <u>Astral Body</u> which could be made up of other two Energies cannot be measured by physical tools of Science. 8)-<u>Energy</u> cannot be created or destroyed. [Theory of '<u>Conservation of Energy:</u> E=mc² -*Albert Einstein*'/20th century]

FIGURE-01

- 9)-Dark Matter(*a gathering of neutrons*) <u>expands</u> through a <u>'Spherical Vortex</u>' creating a Galaxy and <u>contracts</u> back in to the same dark matter.
 - Supported by: 'Pendulum type of dynamics without creating or destroying energy'-(Albert Einstein/20th century)
 - 2. Supported by: 'Cyclic type of repeatable dynamics'-(*Hinduism* /long existing religion before Buddha)

- Supported by: '<u>Viwatta Chakkawala'</u>- Expanding Galaxies and '<u>Samwatta Chakawala</u>'- Contracting Galaxies-(Buddha/6th century BC)
- [The 'Spherical Vortex' is the dynamic organization behind the Phase <u>Transformation</u> of Matter, in contracting to the <u>absolute zero</u> and in expanding to the <u>infinity</u>. The distance of the dynamics, has to be recognized as the <u>4th Dimension</u>.]
- 10)- Whence the Planetary Climate becomes suitable with adequate Nitrogen, Carbon, Oxygen, Calcium, Moisture & Heat, the first ancestors of <u>Flora</u> and <u>Fauna</u> crop up as <u>Algae</u> and <u>Bacteria</u>.
- 11)- <u>Nature</u>, who owns the <u>Material</u>, is also the incomparable <u>Designer</u> to create the <u>Universe</u> and to decorate it with <u>Life</u>, through its <u>Evolutionary</u> <u>Processes</u>.
 - <u>Process of the Physical Evolution of Life</u>(Flora & Fauna):-'Theory of Natural Selection'-*Charles Robert Darwin(1809-1882*)
 - <u>Process of Soul Evolution of Life</u>(Fauna): "<u>Reincarnation-</u> <u>'Eternal Life Cycle' with Rebirths".</u>
 - 1. Buddha/ 6th century BC
 - 2. Supported by findings of Edgar Cayce/(1809-1882)

- 12)- <u>Mind</u> is the software package which interacts with the <u>Brain</u> (the hardware), offered to Fauna by <u>Nature</u>, to sense <u>Changes</u> and react for <u>Survival</u>.
- 13)- Visual, auditory, gustatory, nasal & tactile are the <u>intake signals</u> that comes to the <u>Brain</u> as electromagnetic pulses through the <u>five sensory</u> <u>organs</u> in the animal body.
- 14)- <u>Mind</u>, the software package offered to <u>Fauna</u>, is developed up to a degree of <u>Maturity</u> through experience gained by living(existence).
- 15)- The Eternal Life Cycle (<u>Sansara</u>), <u>Begins</u> in fauna, with the <u>Wrong Claim (Avidya</u>) cropped up in Mind, as '<u>Me &</u> <u>Mine</u>' and ever since, <u>Mind Deposits (kamma</u>) are made to earn <u>Rebirth</u>. (*Buddha/ 6th century BC*)
- 16)-<u>Cohesiveness of Mind(Thanha</u>) with regard to <u>Attraction</u> upon pleasant signals as well as <u>Repulsion</u> upon unpleasant signals, if followed with <u>Action</u>, makes <u>Mind Deposits ('Kamma'-a package of 'Upadana'</u>) in

the <u>Soul-Astral Bank (Vinnana</u>) as provisions for <u>Future</u> <u>Life</u> -[Buddha/ 6th century BC].

- 17)- 'Soul Evolution' is the hidden natural phenomenon behind the scene, which could promote the matured Fauna towards the level of Supremacy-'<u>Humanity'</u> -in the evolutionary process of 'Soul Civilization'.
- 18)- <u>Good deeds</u> harvest <u>Good results</u> and bad deeds earn bad results based on the Fundamental Nature Principle '<u>Action and Reaction'</u> 1-'Kamma-Phala Niyama'-(Buddha/ 6th century BC)
 2-'Reap what you sow'- (Jesus Christ/During Domini)
 3-Supported by: the Physical Law 'Action and Reaction'-(Sir Isaac

Newton/1642-1727)

19)- '<u>Astrology</u>'-the ancient technology exhibits how matured '<u>Mind Deposits</u>' in the <u>Soul-Astral Bank</u> are drawn to the cash counter at <u>present</u> by cyclic visits of planets in to the 12 star houses in the sky, to bring <u>Happiness & Sorrow</u> periodically being based on the horoscope(birth chart). The reaction is therefore not always immediately after the action but late in this rotary dynamics- (The mechanism behind Astrology however is still being studied)

20)-<u>Humanity</u> is the summit senior state of <u>Soul</u>
<u>Evolution</u> and it is also the turning point for Promotion to <u>Divinity</u> or <u>Supreme Humanity</u> and contrarily,
Demotion to Devilry or helpless Humanity and perhaps returning to the evolutionary stream back as animals.
1-(*Buddha/ 6th century BC*),

(Supported by the other religious philosophies too, up to a certain extent)

- 21)- The <u>Eternal Life</u> facilitates Souls with a common package to choose their own path to harvest '<u>Happiness</u>' and '<u>Sorrow</u>', which exist 50% by 50% balance in <u>Nature</u>.
 - Some are harvesting a bigger portion of Happiness at present while some are sunken in deep Sorrow, being resulted largely upon their Past Deeds in previous births.

22)- <u>Commitment</u> to Make others Happy is the Golden Path to <u>Happiness</u>.

1-'*Maithree, Karuna, Dana and Seela*'- Behaving well behalf of others –(*Buddha/6th century BC*)

2-'Love thy neighbors' -(Jesus Christ/Origin of Domini)

3-'Fasting (to spare Resources for the Poor) or unless Feeding the Poor' -Muhammad-(7th century AD)

'Exploiting Resources' by <u>Introvert</u> <u>thinking</u>, shall result <u>Demotion</u> of souls down to the 'Regions of Sorrow' in the Life Chart.

'Sharing Resources' by <u>Extrovert</u> <u>thinking</u>, shall <i>Promote people up to the 'Regions of Happiness' in the Life Chart.

FIGURE-02: THE LIFE CHART

23)-Just as Leaders & Rulers are born to govern any Human Community or Animal Habitat, there should be <u>Heads</u> to govern Heavens and Hells as well. Besides that, the Heads of Heaven and Hell could have some <u>Directing Authority</u> upon Human Civilization just like, the Head of the Senior School looks in to the <u>Disciplinary Aspects</u> in the Primary School.

- (logical reasoning)

24)-As there is a <u>Beginning</u> for Eternal Life, there should be a definite <u>End</u> as well, for the Eternal Life.

- (logical reasoning)

25)- The Eternal Life Began in You, with the <u>Wrong Claim</u> as '<u>Me & Mine</u>' that cropped up in the <u>Mind</u> and after a long Evolutionary Journey with an <u>uncountable</u> number of Rebirths, it <u>Ends</u> in the <u>Self-Realization</u> of the <u>Mistake</u> made by thyself at the Entrance.

<u>Cohesiveness</u> (*Thanha*) in the mentality regarding input <u>Signals</u> is gone with the <u>supreme self-realization</u>, and thence no more <u>Mind Deposits</u> to cause <u>Rebirths</u> and that is the <u>Absolute Exit</u> (*Nibbna*) from this <u>Meaningless</u> <u>Life Trap of Nature</u>. [Only matured <u>Human Beings</u> and <u>Gods</u> are capable of attaining that supreme degree of <u>Self-Realisation</u> (*Arhath*) -Buddha/6th century BC]

Message from the Author:

- Everybody in the world has the right to know the 'Light of <u>Truth</u>' before dying, which could help either to <u>Exit</u> from this <u>Life Trap of Nature</u> or unless to remain at least, within the <u>Happy Zone</u> of this dangerous <u>Eternal Life Cycle</u>.
- Man is given six sensory organs including 'Mind', to measure the 'World' and hence <u>Mind Exploration</u> too, has to be recognized as an essential part of Science.
- Founders (explorers) must be respected for their explorations but not necessarily to worship and believe them or to conserve their Theories without Testing.
- There is no need at all to get rid of your <u>Religious Philosophy</u> or to give up <u>Theories</u> in the long term Acceptances because, the same <u>Reality of Nature</u> could have been <u>interpreted</u> in many different ways and by different tongues.

My part in this regard is only to array the <u>Existing Knowledge</u> <u>Base</u> so far accumulated in the world, for easy Understanding with a little bit of added selfexploration to fill the gaps.

"NOT TO ACCEPT BUT TO TEST" Cyril H Thalpe Gamage /2017
